Steps to Search any URL through Crawlii.pro

1. Go to crawlii.pro website and you will see crawlii.pro homepage. You can add any URL of any website you want to analyze, see attached screenshot:
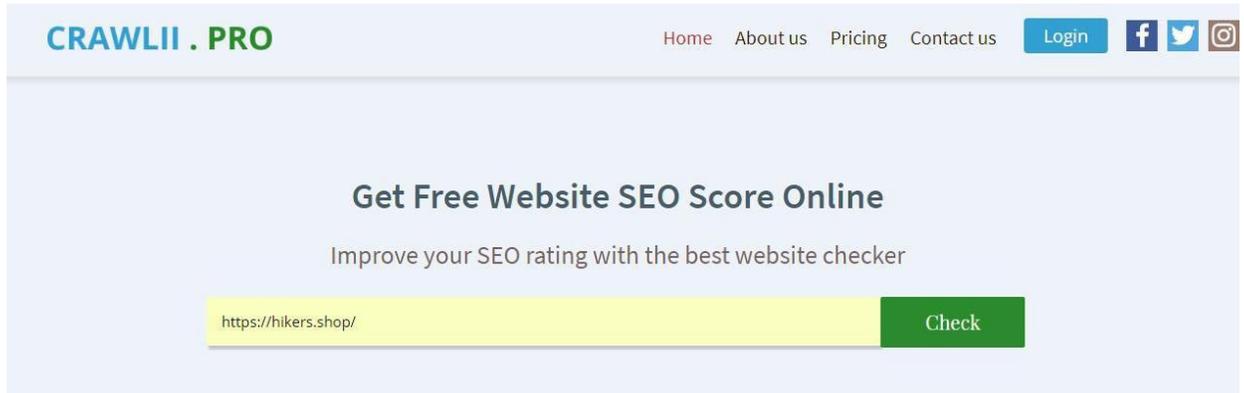

2. If you are not logged in you will be redirected to login page. This means that you need to register with us and then you can login through login page and. (it is completely free)

3. Thereafter you will be able to check any URL and find website related suggestions, issues and other information like screenshots, page speed, page size etc.
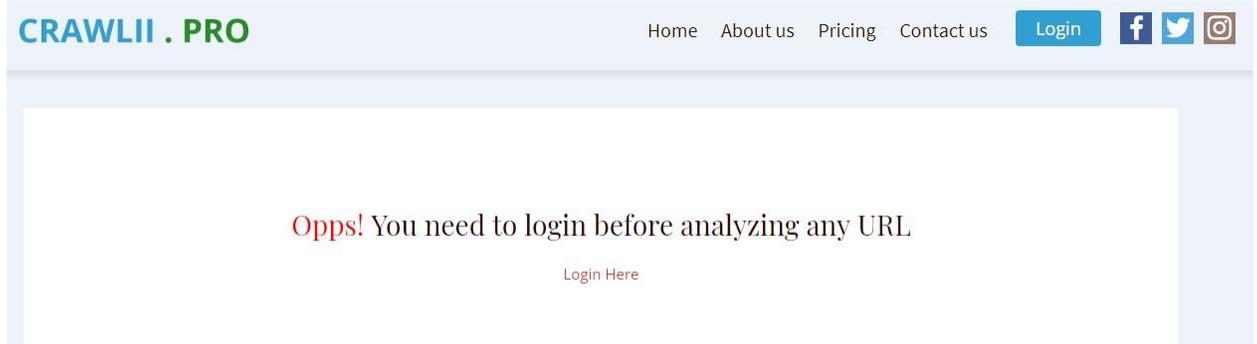

Login Screen
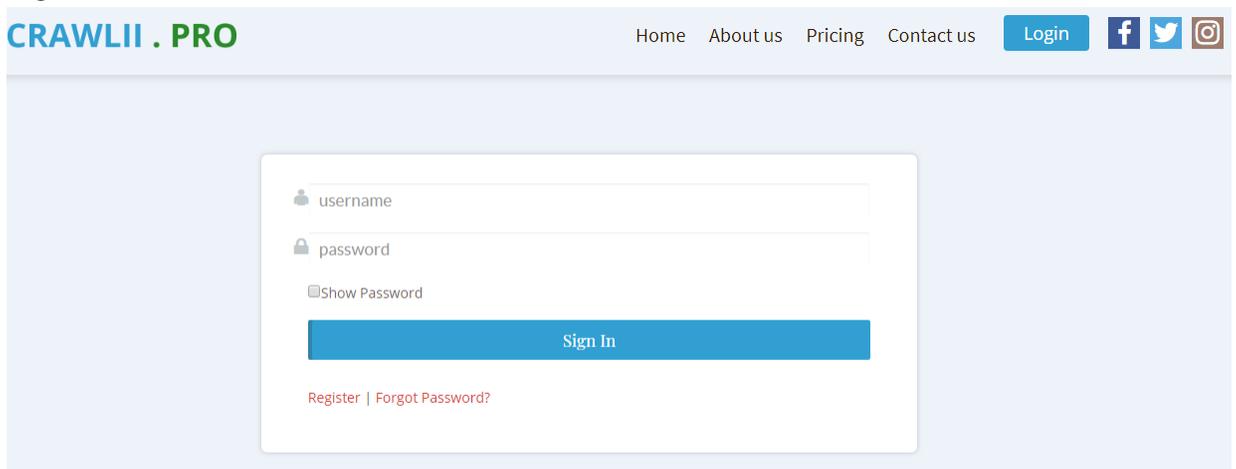

4. After login add any URL and click on button. You will then see loading screen. You need to wait for approx. 2 minutes to get results.

5. Note: if you analyze a very large website - heavy with content then time will increase.
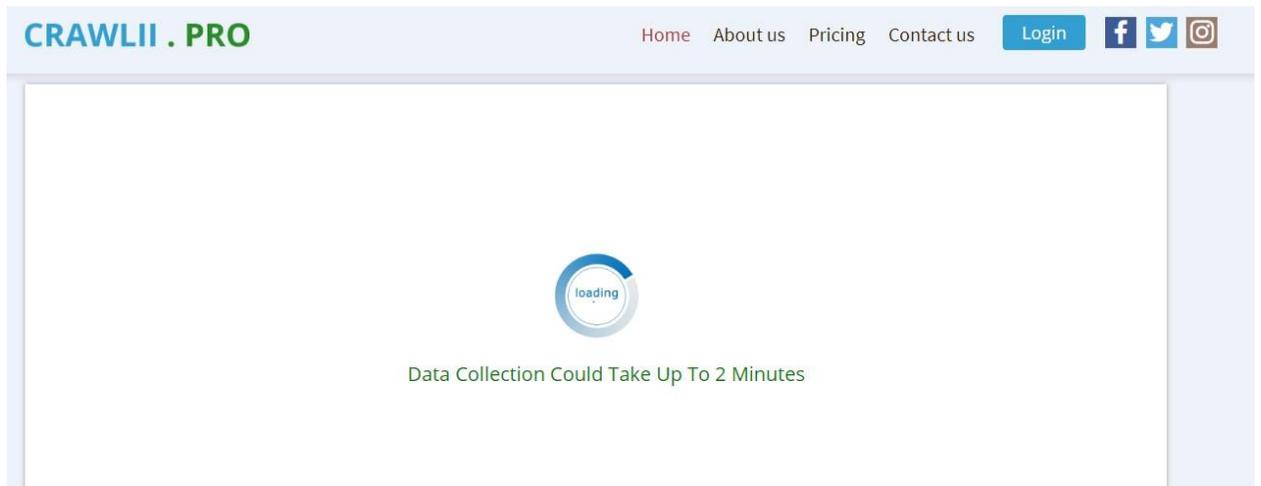

6. After successfully analyzing the URL you will see results like below screenshots:
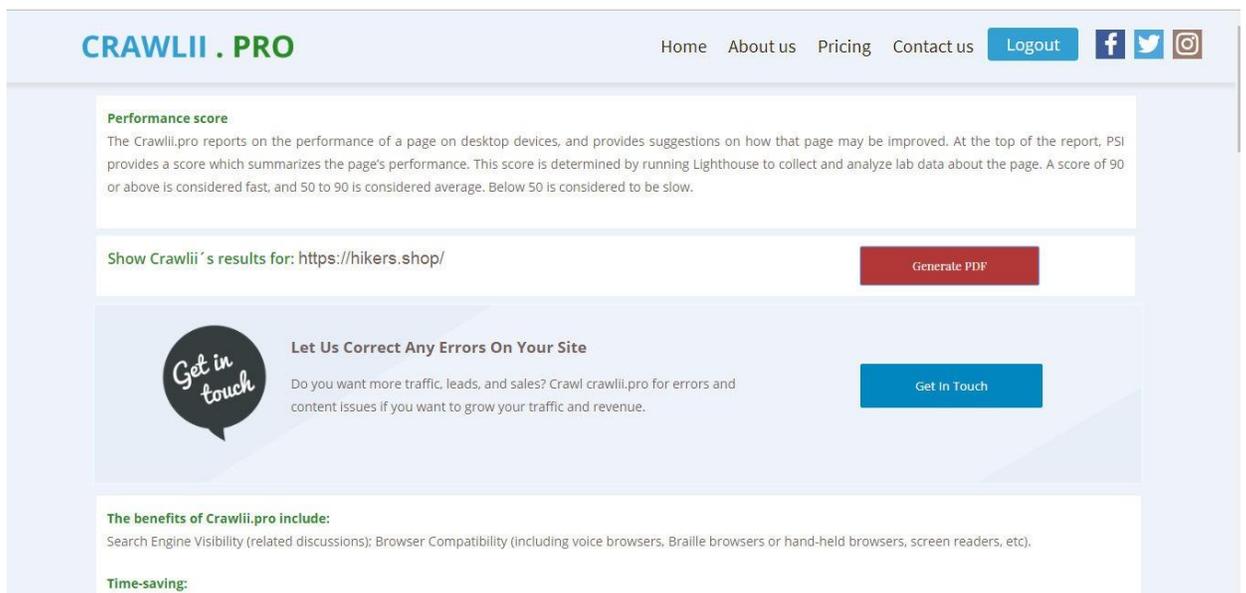

7. In Our Search we are checking website HTML/CSS/JS/JQuery Errors and then show results in **Website Validate Errors** section like you see in above screenshot.
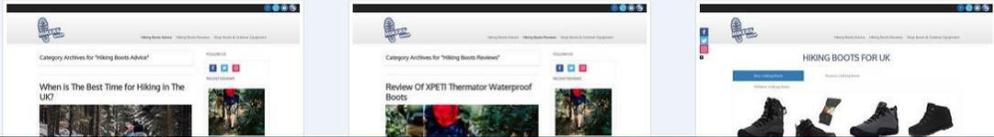

Website Validate Errors See Result

Validating a website is the process of ensuring that the pages on the website conform to the norms or standards defined by various organizations. ... The World Wide Web Consortium sets the standards and also hosts a variety of web page validators.

1 . Error: Warning Message :

The "type" attribute for the "style" element is not needed and should be omitted.

2 . Error: Warning Message :

The "type" attribute is unnecessary for JavaScript resources.

3 . Error: Warning Message :

The "type" attribute for the "style" element is not needed and should be omitted.

8. We are checking **Performance Scores** of the website. This covers website´s Speed/Performance in percentages.

Performance Scores See Result

At the top of the report, PSI provides a score which summarizes the page's performance. This score is determined by running Lighthouse to collect and analyze lab data about the page. A score of 90 or above is considered fast, and 50 to 90 is considered average. Below 50 is considered to be slow.

PageSpeed Score :

74/100

Site Title :

Home | Hikers Shop The Best Men's Hiking Boots Advice and Reviews

Site Url :

https://hikers.shop/

Score Result :

74% - PageSpeed: Medium
